-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cooper (US 3551897). Copper '897 discloses a flotation process in which device 34 measures the thickness of the froth, overflow outlet near 21 defines the pulp level and is controlled thereat. The tailings (accept) concentration is measured at 37 and the froth, among other things, is controlled via means 44 [Table bridging col. 3 and 4 at the bottom].

3. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by CA 1015869. In CA 1015869 there is a tail (accept) sensor 28 and the computer 30 controls the pulp level in the cell d.

4. Claims 1-2 and 6-11 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 4429277. DE '277 discloses a deinking flotation cell 10 which includes measuring the froth and pulp levels, measuring a quality of

the accept fraction at 28 and controlling, among other things, the froth and the pulp level in response to the accept measurements.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3-5 and 12-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE '277 as applied to claim 1 above, and further in view of Ortnier (US 5062964). The use of plural flotation cells in deinking is the industry norm and to include a set of cells along with the single deinker cell illustrated by DE '277 would have been obvious to one of ordinary skill in the art.
